

Elie Ephram

Software & Full Stack Developer

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of hands-on professional and freelance experience building responsive web applications, scalable backend systems and API-driven systems. Proficient in React, React Native, JavaScript, Node.js, and RESTful Web APIs, with experience in Python programming and relational and non-relational databases (MongoDB & MS SQL Server). Strong focus on clean architecture, and production-ready software.

WORK EXPERIENCE

WEBMASTER

Aug 2023 - Present

Admic SAL

Beirut

- Managed and optimized enterprise e-commerce platforms, resolving performance bottlenecks and improving system reliability for high-traffic customer environments.
- Implemented responsive user interfaces with HTML, CSS and JavaScript, delivered dynamic, mobile-friendly designs, accelerating frontend development.
- Improved frontend performance and accessibility scores by 40% using Lighthouse audits, semantic HTML, and optimized asset delivery.
- Worked in an Agile (Scrum) environment using Jira for sprint planning, backlog management, and task tracking.

FREELANCE WEB/SOFTWARE DEVELOPER

Jan 2022 - Present

Self-Employed / Freelance

Beirut

- Architected and developed a **proprietary** full-stack MERN-based e-commerce platform with reusable React component architecture, ensuring UI consistency and maintainability (**demo available upon request**).
- Designed and integrated APIs using Node.js and Python (FastAPI) enabling secure communication between frontend, backend, and third-party services.
- Integrated third-party SaaS services (payment gateways, and analytics) into full-stack applications.
- Developed a responsive admin dashboard for product and order management, improving multi-device performance by 30%.
- Delivered and maintained ongoing client projects, including SEO optimization, contact form integration, and post-launch support.
- Portfolio with demos:** <https://progsecdev.github.io/my-portfolio/>

TECHNICAL CONSULTANT

Oct 2022 - Jun 2023

Data Rho

Jdeideh

- Developed and maintained software applications using VB.NET and MS SQL Server, ensuring optimal performance and scalability.
- Executed thorough unit testing to validate code integrity, reducing defects, resolving software issues, and improving user experience.
- Utilized Jira for project tracking, milestone planning, and effective cross-functional collaboration.

- Completed 6-month specialized training as an Aviation Mechanic Technician, then served 2 years performing maintenance, inspection, and troubleshooting on military helicopters, ensuring operational readiness and flight safety.
- Served 5+ years in the Office of a Senior Army General as an Executive Assistant, managing confidential communications, scheduling, document handling, and high-level operations.
- Operated as a Social Media Monitor for 6 months, tracking, analyzing, and reporting on digital communications and online activity relevant to operational awareness.
- Served as an Arabic-English Translator for 6 months, providing accurate written and verbal translation between military personnel, documents, and international counterparts.
- Completed Bachelor's degree in MIS during active service (2014-2018), demonstrating exceptional discipline, time management, and ability to perform under high-pressure environments.
