Elie Ephram

Software & Full Stack Developer

PROFESSIONAL SUMMARY

Full Stack Developer with professional and freelance experience building responsive web applications, backend systems, and API-driven solutions. Proficient in React, JavaScript, Node.js, and RESTful Web APIs, with experience in Python programming and relational and non-relational databases (MongoDB & MS SQL Server). Strong focus on clean architecture and production-ready software.

WORK EXPERIENCE

WEBMASTER **Aug 2023 - Present**
Admic SAL Beirut

- Managed and optimized enterprise e-commerce platforms while implementing responsive HTML, CSS, and JavaScript interfaces for high-traffic customer environments.
- Improved frontend performance and accessibility scores by 40% using Lighthouse audits, semantic HTML, and optimized asset delivery.
- Worked in an Agile (Scrum) environment using Jira for sprint planning, backlog management, and task tracking.

FREELANCE WEB/SOFTWARE DEVELOPER **Jan 2022 - Present**
Self-Employed / Freelance Beirut

- Architected and developed a **proprietary** full-stack MERN-based e-commerce platform with reusable React component architecture, ensuring UI consistency and maintainability **(demo available upon request)**.
- Designed and integrated APIs using Node.js and Python (FastAPI) enabling secure communication between frontend, backend, and third-party services.
- Developed a responsive admin dashboard for product and order management, improving multi-device performance by 30%.
- Delivered and maintained ongoing client projects, including SEO optimization, contact form integration, and post-launch support.

TECHNICAL CONSULTANT **Oct 2022 - Jun 2023**
Data Rho Jdeideh

- Developed and maintained software applications using VB.NET and MS SQL Server, ensuring optimal performance and scalability.
- Executed thorough unit testing to validate code integrity, reducing defects, resolving software issues, and improving user experience.

MILITARY SERVICE **Jun 2013 – Jul 2022**
Lebanese Armed Forces Lebanon

- Served in multiple technical and administrative roles, including **Aviation Mechanic Technician** and **Executive Assistant to a Senior Army General**, developing strong problem-solving, organizational, and high-pressure decision-making skills.
- Completed a **Bachelor's degree in Management Information Systems (MIS)** while serving full-time (2014–2018), demonstrating strong discipline and time management.

PROJECTS

NEXIVA — AI-Powered E-Commerce Shopping Assistant | Python, AI/LLMs, MongoDB

- Developed an AI-powered shopping assistant that interprets customer requirements and provides contextual product recommendations from e-commerce catalogs.
- Engineered a Python catalog pipeline to extract, normalize, export, and validate MongoDB product data across CSV and JSON formats.

Full-Stack E-Commerce Platform | React.js, Node.js, Express.js, MongoDB

- Built a full-stack e-commerce platform featuring authentication, product and variant management, cart, wishlist, checkout, order management, RESTful APIs, and a responsive admin dashboard.

Interactive Event Photo-Sharing Platform | ASP.NET Core MVC, C#, Entity Framework Core, SQL Server

- Developed an event photo-sharing platform featuring multi-image guest uploads, admin moderation, role-based authentication, a public gallery, and user likes.
