

Elie Ephram

Software & Full Stack Developer

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of hands-on professional and freelance experience building responsive web applications, scalable backend systems and API-driven systems. Proficient in React, JavaScript, Node.js, and RESTful Web APIs, with experience in Python programming and relational and non-relational databases (MongoDB & MS SQL Server). Strong focus on clean architecture, and production-ready software.

WORK EXPERIENCE

WEBMASTER

Aug 2023 — Present

Admic SAL

Beirut

- Managed and optimized enterprise e-commerce platforms, resolving performance bottlenecks and improving system reliability for high-traffic customer environments.
- Implemented responsive user interfaces with HTML, CSS and JavaScript, delivered dynamic, mobile-friendly designs, accelerating frontend development.
- Improved frontend performance and accessibility scores by 40% using Lighthouse audits, semantic HTML, and optimized asset delivery.
- Worked in an Agile (Scrum) environment using Jira for sprint planning, backlog management, and task tracking.

FREELANCE WEB/SOFTWARE DEVELOPER

Jan 2022 — Present

Freelance

Beirut

- Architected and developed a full-stack MERN-based e-commerce platform, built reusable and scalable React component architecture ensuring UI consistency and maintainability across the platform.
- Designed and integrated APIs using Node.js and Python (FastAPI) enabling secure communication between frontend, backend, and third-party services.
- Integrated third-party SaaS services (payment gateways, and analytics) into full-stack applications.
- Developed a responsive admin dashboard for product and order management, improving multi-device performance by 30%.
- Conducted functional testing and debugging to ensure application stability, usability, and production readiness.
- Configured and maintained development and hosting environments on Linux servers, optimizing deployment workflows and system reliability.

TECHNICAL CONSULTANT

Oct 2022 — Jun 2023

Data Rho

Jdeideh

- Developed and maintained software applications using VB.NET and MS SQL Server, ensuring optimal performance and scalability.
- Executed thorough unit testing to validate code integrity, reducing defects, resolving software issues, and improving user experience.
- Utilized Jira for project tracking, milestone planning, and effective cross-functional collaboration.
- Delivered remote technical support via AnyDesk, resolving client issues efficiently and maintaining system uptime.
- Collaborated with clients and cross-functional teams to identify requirements and deliver technical solutions aligned with business needs.
- Evaluated and implemented modern tools and technologies to improve performance, maintainability, and development efficiency.

EDUCATION

MANAGEMENT INFORMATION SYSTEM

Arts, Science and Technology University in Lebanon

Oct 2014 - Jun 2018

Beirut

COMPUTER SCIENCE

Arts, Science and Technology University in Lebanon

Feb 2023 - Jul 2025

Beirut - Dekwaneh

SKILLS

Frontend: HTML, modern CSS architecture, JavaScript, React.js, TypeScript, Next.js, Liquid, responsive & accessible UI development.

Backend: Node.js, Express.js, Python, C#, ASP.NET Core.

Databases: MongoDB, MS SQL Server.

DevOps & Cloud: AWS (basic), deployment workflows, cloud deployment fundamentals.

Tools: Git, GitHub, Jira, Postman, VS Code, Visual Studio.

Systems & Integration: API integration (RESTFUL Web APIs, & FastAPI), system interoperability, third-party platform integration, webhook handling.

CMS: Shopify, Salesforce Commerce Cloud, WordPress.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

React & Next.js Advanced Architecture

Udemy.com

Feb 2025 — Aug 2025

Machine Learning with Python (Scikit-Learn, Pandas)

Udemy.com

Jan 2025 — Present

LANGUAGES

English (*C1 - Advanced*), French (*B2 - Upper intermediate*), Arabic (*Native*).

INTERNSHIPS

TECHNICAL INTERN

Aug 2022 — Sep 2022

Beirut

- Designed and implemented responsive user interfaces utilizing HTML, CSS, JavaScript and C# while connecting the UI to the database MS SQL Server and enhancing scalability, usability and user engagement.

IT INTERN

Apr 2022 — Jul 2022

Beirut

- Diagnosed and resolved network and system issues using a layered OSI Model approach, improving infrastructure reliability.
- Deployed and managed web hosting environments on Windows Server and Linux-based virtual machines, supporting internal and client-facing services.
- Applied foundational knowledge of DNS and DDNS to ensure proper domain resolution and dynamic updates and HTTPS protocols with SSL Certificates, enhancing web security and user trust.
